PMA SOLUTIONS

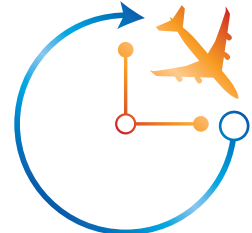

EASE OF
MAINTENANCE

REDUCING COSTS
INCREASED SAVINGS

HIGH QUALITY AND
INCREASED DURABILITY

IMPROVED
TURN-AROUND-TIME

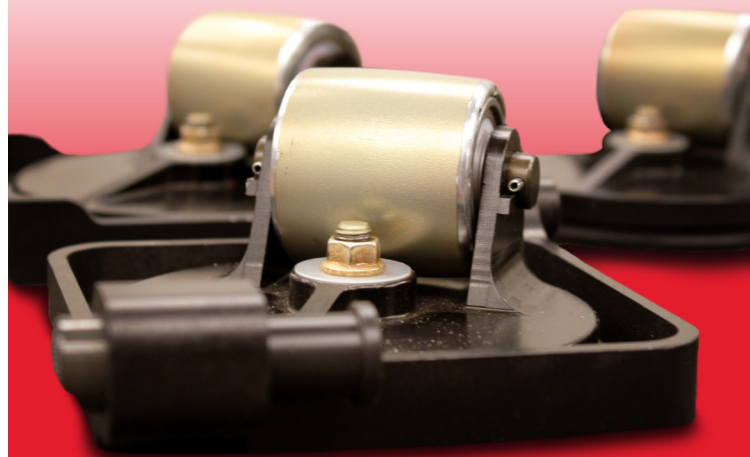

At **FCAH AEROSPACE**, we are committed to providing innovative solutions that can help support your business objectives. Our PMA solutions are designed to help your organization reduce costs, increase durability, and improve turn-around time. We have Girt Assembly, Cylinders, and Portable Studs that support various fleets that are available for purchase today. Additionally, we are the exclusive distributor of PMA roller systems for cargo aircraft through First Class Air Support.

*The Exclusive Distributor of
PMA Roller Systems*

Offering reduced cost, lower lead time, and available inventory.

- Decrease the number of repairs needed from 6 months to a year with our PMA Roller System
- Decreased amount of wear and tear on Unicasters due to dirt and grease
- And increased effectiveness by using polymer over the aluminum used for the OEM alternative

AVI PMA SOLUTIONS

PMA Girt Assembly

- Constructed of a high-strength, urethane-coated nylon fabric with an aluminized coating to protect against radiated heat. It is a crucial component of the emergency evacuation slide for passenger and crew evacuation.
- Connects the slide to the aircraft door and automatically deploys when opened during an emergency.
- Inflate after the pack ejects, ensuring a safe and efficient evacuation process.
- Available for Boeing 737 5A3307-701 and 5A3307-9.

AVI offers PMA cylinders, reservoirs, and portability studs.

BENEFITS OF PMA PARTS:

- Reduced lead time with in-stock inventory
- The same quality as the OEM alternative
- Lower cost in comparison to the OEM part
