SPECIFICATIONS

AVI Survival Products Life Rafts conform to FAA TSO C70a requirements. The life raft is a double tube inflatable design, with 2 independent buoyancy tubes. Classified as a Type I Transport category life raft recommended for Corporate and General Aviation. This life raft series is constructed with Urethane coated Nylon Fabric using thermo bonding technology. Each raft includes the following: stabilizing Water Ballast system, hand pump, bailing bucket, sea anchor, secured life-lines on the exterior perimeter and interior, and an inflation/retaining line that is attached to a high strength patch on the raft to prevent drifting and a water activated locator light. Aluminum cylinders and valves are added to reduce corrosion while packed and in use. The Soft-Pack Valise is made of heavy-duty polyester fabric with secured Velcro closures for a tightly packed raft. These rafts are engineered to reduce overall weight and deliver a compact design for easy transport and stowage for any aircraft compartment. AVI life rafts come with a 3-year warranty on parts and labor.
